Thank you for making plans to have your pet spayed or neutered. Your decision will help your dog or cat to be a healthier, happier pet. And, because you are being a responsible pet owner, your pet will not add to the number of unwanted dogs and cats that end up in shelters or wandering our streets.

ROVER staff will let you know **Drop-off** and **Pick-up** times

Please read this information packet carefully BEFORE your appointment. If you have questions, you may leave a message at (615) 352-4030. One of the ROVER staff will call you back as soon as possible.

Plan to arrive ON TIME. Once the ROVER staff begins to prepare for surgery, they are not able to talk with or check in latecomers.

If you cannot keep your appointment, please let us know as far ahead of time as you can. We may be able to let another pet owner have your space.

- Before appointment day, leave a message at 352-4030.

ALL cats must be brought to the ROVER clinic in a pet carrier, lined with newspaper-no towels. If brought in a box please make sure there are plenty of air holes in the box, your cat will be sent home after surgery in their carrier or box carrier to keep him safe and comfortable. ALL Dogs must be on a leash.

RELEASE OF LIABILITY

I, being of legal age and responsible for the animal described on the back of this document, hereby request and authorize the veterinarians and assisting staff hired by Nashville Humane Association to perform sterilization surgery, provide necessary treatment and administer requested vaccinations to said animal.

I understand that although reasonable precautions will be taken, the operation presents hazards and that injury or death of the animal may result, for there is risk in the procedure itself and the use of anesthetics and drugs used in providing this service. Any questions regarding the risks involved have been answered to my satisfaction. Pets will not be tested for heartworm disease prior to surgery. If present, there is a greater risk of anesthetic complications. I also understand that vaccination can cause adverse reactions in some animals, which may result in death.

If in the course of the surgery a condition is discovered which requires medical attention or an additional procedure, such as hernia repair or the administration of IV fluids, the attending veterinarian may, in his absolute discretion perform such procedure.

I further understand that as long as, in the opinion of the attending veterinarian, that animal is an acceptable surgical candidate, sterilization procedures will be performed regardless of the animal's sex or medical condition (including pregnancy). I understand that the attending veterinarian can refuse to perform any procedure on any animal for any reason. Such refusal is at the sole discretion of the attending veterinarian.

I certify that my animal is in good health and has had no food since 10:00 PM the evening prior to surgery. I understand that my pet will not be receiving a complete health examination before surgery. I also understand that it is my responsibility to notify the medical staff of any known medical condition and/or drugs that my pet is taking.

I understand that all animals must be picked up from the clinic at the time designated by the clinic staff on the same day as surgery. If I do not claim the animal, I understand that after 48 hours the animal will be considered abandoned and the animal will be disposed of in accordance with the State of Tennessee Law. I understand that once any animal has been abandoned, I relinquish all ownership rights.

I hereby release the Nashville Humane Association, the veterinarians, assistants, and all of its officers, directors, employees, and staff members from any and all claims arising out of or connected with the performance of these operations or procedures. I agree that I have not and will not claim any right of compensation from them, or file any action by reason of such sterilization or attempted sterilization of such animal or any consequences related thereto.

BEFORE SURGERY

Your pet will NOT have blood tests or other tests to tell if there are health problems. Your pet is at an increased risk of complications from the anesthesia if he or she has not been on heartworm preventative and has heartworm disease. Please understand that if your animal is pregnant there is an increased risk of mortality due to surgical complications. We may not perform surgery on any animal that is crypt orchid (one or both testicles have not dropped).

Follow these instructions to help keep your pet safer during surgery:

1. Bathe your pet 1-2 days before surgery if needed. A pet that is clean on surgery day is less likely to get an infection. You will not be able to bathe your pet for at least 2 weeks after surgery.
2. Do not let your pet eat or drink anything after 10:00 PM the night before surgery. Be sure to remove food, treats, rawhides, or anything else your pet might eat.
3. On the night before surgery, if your pet is weighs less than 10 lbs, feed a small meal between 11 pm to midnight the night before.
4. When you bring your pet for your appointment, tell the ROVER staff about any health problems your pet has and about any medicines he or she is taking. If your pet is taking medicine, please inform the ROVER staff before surgery. For example, if your pet takes medicine in the morning, give it as usual on the morning of surgery (with a small quantity of food with medicine).
